Subject Index

Volume 11, 1989

Contributor index on page 451.

- Adaptive** color basis transformation, aid in image segmentation, 53
- Adenocarcinoma**, rectal, nuclear morphometric measurements, 173
- Aneuploidy** in mild pulmonary dysplasia, correlation with dissociation of protein and DNA content, 255
- Antibody** (*see* monoclonal antibody)
- Artificial intelligence systems** (*see* expert systems)
- Aspiration biopsy/cytology/cytopathology**, (fine) needle (FNA, FNAB, FNAC, FNABC)
- Breast, image and textural analysis, comparison with prostate, 105
 - Human solid tumors, method of extracting DNA for Southern blot analysis, 375
 - Liver, primary versus metastatic carcinoma, immunofluorescence identification of endothelial cells, 8
 - Pancreas, carcinoma, use of computerized cytomorphometry, 238
 - Prostate, image and textural analysis, comparison with breast FNA, 105
- Bethesda System** for reporting cervical and vaginal cytologic diagnoses, 291
- Bladder**, urinary, comparative morphometric grading of transitional cell carcinoma, 426
- Bone**, osteosarcoma, ploidy and morphology, 96
- Bowenoid papulosis**, female genital, classification as low-grade *in situ* carcinoma by histomorphologic and DNA ploidy studies, 419
- Brain**, tumor-invaded, image analysis assessment of vascularization, 286
- Breast**
- Benign and malignant lesions, staining with MAbs B72.3 and MA5, 33
 - Cancer
 - DNA grading of malignancy, 73
 - Representativity and reproducibility, 81
 - Relation of computerized morphonuclear image analysis and histomorphologic grading, 433
 - Carcinoma
 - ER analysis using IC and image analysis, 307
 - PR analysis using IC and image analysis, 298
 - FNA, image and textural analysis, comparison with prostate FNA, 105
 - Infiltrating ductal carcinoma, DNA measurements in cases with long-term follow-up, 166
- Cancer**, breast
- DNA grading of malignancy, 73
 - Representativity and reproducibility, 81
 - Relation of computerized morphonuclear image analysis and histomorphologic grading, 433
- Carcinoma**
- Ampullary, cytometric predictors of prognosis after resection, 243
 - Bladder, transitional cell, comparative morphologic grading, 426
 - Breast
 - DNA malignancy grading, 81
 - ER analysis using IC and image analysis, 307
 - Infiltrating ductal, DNA measurements in cases with long-term follow-up, 166
 - PR analysis using IC and image analysis, 298
 - SPF calculation, 391
 - Cervix, karyometric marker features adjacent to
 - In situ*, 275
 - Invasive, 281
 - Human solid, two-color multiparametric FCM DNA analysis using staining for cytokeratin and LCA, 391
 - Liver, primary versus metastatic in FNA, immunofluorescence identification of endothelial cells, 8
 - Lung
 - Bronchioloalveolar, morphologic and IC studies, 261
 - Large cell, cytomorphometry, 48
 - Ovary
 - Characterization, 324
 - Papillary, correlation of LM and EM features, 331
 - Pancreas, diagnosis by FNAC and computerized cytomorphometry, 238
 - Thyroid, papillary, correlation of LM and EM of nuclear features, 331
 - Vulva, *in situ* (bowenoid papulosis), DNA and histomorphologic studies, 419
- Cell cycle**
- Cytometric analysis of subpopulations, 232
 - FCM calculation of S-phase fraction
 - In breast and colon carcinoma, 391
 - Influence of elimination of lymphocytes from tumor cell suspensions, 384
- Cell features**, splenocytes from normal and nutrient-restricted mice, computerized morphometric quantitation, 407

Cells, endothelial, differentiation of primary and metastatic carcinoma in liver FNA, 8

Cervix

Benign versus malignant specimens, diagnosis by multi-fiber optic microspectrophotometer and FCM, 196

Carcinoma, karyometric marker features adjacent to *In situ* lesions, 275

Invasive lesions, 281

Cytology, Bethesda System for reporting diagnoses, 291

Intraepithelial neoplasia (CIN), DNA analysis in punch biopsy specimens, 187

Lesions, diagnostic and prognostic value of DNA cytometry in the cytologic evaluation, 177

Chromatin changes due to calorie restriction, computerized morphometric differentiation, 361

Colon

Carcinoma, DNA malignancy grading, 81

Lesions, expert system for, 249

Condyloma, cervical, DNA analysis in punch biopsy specimens, 187

Cytokeratin, staining in two-color multiparameter FCM DNA analysis of carcinomas, 391

Cytology

Bronchial, standardized thionin-eosin stain for, 131

Cervical, Bethesda System for reporting diagnoses, 291

Vulvar skin, Paget's disease, 413

Cytometry (*see also* DNA ploidy, flow cytometry, image analysis)

Analysis of cell-cycle subpopulations, 232

Prediction of prognosis in ampullary carcinoma after resection, 243

Cytomorphometry

Influence of preparatory techniques, selection method and sample size, 225

Large cell carcinoma of lung, 48

Pancreatic carcinoma, adjunct to FNAC diagnosis, 238

Cytopathology, knowledge and decision making, analysis for development of consultant expert system, 154

Cytopreparation

Effect on different IC methods, 22

Influence on cytomorphometry, 225

Lung FNA, IC on cytocentrifuged specimens, 140

Salivary gland tumors, comparison of image cytometry using sections and Cytospin preparations from same paraffin-embedded specimens, 379

Diagnostic encyclopedia workstation for pathologists, 447

Discriminant analysis of monocyte structure in malignant lymphoma, predictive value, 403

DNA analysis, Southern blot, method of extracting DNA from human solid tumors, 375

DNA ploidy analysis

Breast

Grading of malignancy, 73

Infiltrating ductal carcinoma with long-term follow-up, 166

DNA ploidy analysis (continued)

Cervix

CIN and condyloma in punch biopsies, 187

Diagnostic and prognostic value, 177

FCM, two-color multiparametric using staining for cytokeratin and LCA, 391

Feulgen stain

Automated with temperature-controlled machine, 211

Influence of fixatives, 87

Grading of malignancy

Breast cancer, 73

Representativity and reproducibility, 81

Lung

Double tumors, 43

Mild dysplasia, 255

Lymphoid tissue, comparison of fresh and paraffin-embedded samples, 67

Measurement errors with scanning microdensitometer in cytologic and histologic samples, 353

Multinucleated tumor cells and derived microcells, 59

Osteosarcoma, relation to morphology, 96

Prediction of prognosis in ampullary carcinoma after resection, 243

Salivary gland tumors, comparison of image cytometry using sections and Cytospin preparations from same paraffin-embedded specimens, 379

Vulvar skin

Bowenoid papulosis, classed as low-grade CIS, 419

Paget's disease, 413

Electron microscopy (EM)

Thyroid and ovary, papillary carcinoma, nuclear features, 331

Uveal melanoma nucleoli, comparison with measurements on plastic- and paraffin-embedded sections, 111

Vulvar skin in Paget's disease, 413

Estrogen receptor (ER) analysis in breast cancer, IC and image analysis, 307

Expert systems

Analysis of pathology knowledge and decision making for development, 154

Colonic lesions, sensitivity, 249

In histopathology

Diagnostic encyclopedia workstation, 447

Introduction, 1

Knowledge representation and rule-based systems, 147

Representation of knowledge as structured objects, 367

PARTICLE system for grading tumors by image analysis, 440

Eye, melanoma, comparative morphometric measurements of nucleoli in EM and plastic- and paraffin-embedded sections, 111

Feulgen stain

Automated in temperature-controlled machine, 211

Influence of fixatives, 87

- Fixatives, influence on
 Feulgen stain, 87
 Nuclear morphometric features, 219
- Flow cytometry
 Cervical specimens, comparison with multifiber optic microspectrophotometer, 196
 DNA analysis
 Lymphoid tissue, comparison of fresh and paraffin-embedded samples, 67
 Multinucleated tumor cells and derived microcells, 59
 Two-color multiparametric of solid carcinomas using staining for cytokeratin and LCA, 391
 S-phase fraction calculation
 In breast and colon carcinoma, 391
 Influence of elimination of lymphocytes from tumor cell suspension, 384
- Grading, tumor
 Breast cancer
 DNA ploidy-based, 73
 Relation to computerized morphonuclear image analysis, 433
 DNA malignancy
 Breast cancer, 73
 Representativity and reproducibility, 81
 Morphometric of transitional cell carcinoma of urinary bladder, comparative study, 426
 PARTICLE expert system using automated image analysis, 440
- Histometry, prediction of prognosis in ampullary carcinoma after resection, 243
- Histopathology, expert systems in
 Introduction, 1
 Knowledge representation and rule-based systems, 147
 Representation of knowledge as structured objects, 367
- Image analysis
 Brain tissue, tumor-invaded, estimate vascularization, 286
 Breast and prostate FNA, including textural analysis, 105
 Breast cancer, relation to histopathologic grading, 433
 Follicular lymphomas, subclassification, 119
 Quantitation of Paneth cell metaplasia of stomach, 115
 Segmentation, adaptive color basis transformation in, 53
 Tumor grading with PARTICLE expert system, 440
 Voided urine, selective mapping algorithm for, 203
- Image cytometry of salivary gland tumors, comparison of results using sections and Cytospin preparations from same paraffin-embedded specimens, 379
- Immunocytochemistry (IC)/immunohistochemistry (staining)
 Bronchioloalveolar carcinoma, 261
 Comparative evaluation of different techniques, 22
 Lung tumors, analysis of centrifuged aspirates, 140
 MAb B72.3 and MA5 on benign and malignant breast lesions, 22
- Immunofluorescence, endothelial cells to differentiate primary and metastatic carcinomas in liver FNA, 8
- Karyometry, marker features adjacent to cervical carcinoma
 In situ, 275
 Invasive, 281
 Keratin, *see* cytokeratin
- Lesions
 Breast, staining with MAb B72.3 and MA5, 33
 Colon, sensitivity of expert systems for, 249
 Gynecologic, diagnostic and prognostic value of DNA cytometry in cytologic evaluation, 177
 Leukemia, B-cell chronic lymphocytic, antigenic expression of lymphocytes, 315
 Leukocyte common antigen (LCA), MAb staining
 In lymph node FNA in study of NHL, 15
 In two-color multiparameter FCM DNA analysis of carcinomas, 391
 Liver, primary versus metastatic carcinoma in FNA, identification of endothelial cells, 8
- Lung
 Bronchioloalveolar carcinoma, morphologic and IC studies, 261
 Carcinoma, DNA malignancy grading, 81
 Cytology, standardized thionin-eosin stain, 131
 Double tumors, quantitative pathologic analysis, 43
 Large cell carcinoma, cytomorphometry, 48
 Mild dysplasia, dissociation of DNA and protein content as reflector of aneuploidy, 255
 Tumors, IC analysis on centrifuged FNA specimens, 140
- Lymph node, lymphoma
 Follicular, subclassification by computer image processing, 119
 Non-Hodgkin's
 Distinction from reactive hyperplasia, comparison of FCM using fresh and paraffin-embedded tissue, 67
 Staining for LCA and vimentin in FNA diagnosis, 15
- Lymphocytes
 B-cell chronic lymphocytic leukemic, antigenic expression, 315
 Elimination from tumor cell suspensions, influence on FCM calculations of S-phase fractions, 384
- Lymphoma
 Follicular, subclassification by computer image analysis, 119
 Malignant, predictive value of discriminant analysis of monocyte structure, 403
 Non-Hodgkin's (NHL), LCA and vimentin staining in FNA diagnosis, 15
- Mapping algorithm, selective use in computerized image analysis of voided urine, 203
- Melanoma, uveal, comparison of morphometric measurements of nucleoli in EM and plastic- and paraffin-embedded sections, 111

- Metaplasia, Paneth cell of stomach, image analysis quantitation, 115
- Microcells, cytology and FCM DNA analysis, 59
- Microdensitometer DNA measurements, errors in cytologic and histologic samples, 353
- Microspectrophotometry, multifiber optic, cervical specimens, comparison with FCM, 196
- Monocytes, structure, predictive value of discriminant analysis in malignant lymphoma, 403
- Monoclonal antibody (MAb) staining
 - B72.3 and MA5, benign and malignant breast lesions, 33
 - Vimentin, primary versus metastatic carcinoma in liver FNA, 8
- Morphometry
 - Computerized, of mice splenocytes following calorie restriction
 - Cellular features 407
 - Differentiation, 361
 - Grading of transitional cell carcinoma of bladder, reproducibility, 426
 - Nuclear
 - Influence of fixation and tissue processing, 219
 - Rectal adenocarcinoma cells, 173
- Networks, neural/semantic/associative, use in expert systems, 367
- Nuclear shape, evaluation of irregularity, 341
- Nucleolus, uveal melanoma, comparison of measurements in EM and plastic- and paraffin-embedded sections, 111
- Nucleus, morphometric features, influence of fixation and tissue processing, 219
- Osteosarcoma of bone, ploidy and morphology, 96
- Ovary, carcinoma
 - Characterization, 324
 - Papillary, correlation of LM and EM features, 331
- Paget's disease of vulva, cytologic, histologic, DNA ploidy and EM analysis, 413
- Pancreas
 - Ampullary carcinoma, cytometric and histometric predictors of prognosis following resection, 243
 - Carcinoma, diagnosis by FNAC and computerized cytomorphometry, 238
- Papulosis, bowenoid, classification as low-grade *in situ* carcinoma of the epidermis on the basis of histomorphologic and DNA ploidy studies, 419
- PARTICLE expert system for tumor grading using automated image analysis, 440
- Pathology knowledge and decision making, analysis for development of consulting expert system, 154
- PERBAS system for evaluation of nuclear contour irregularity, 341
- Progesterone receptor (PR) analysis in breast carcinoma, use of IC and image analysis, 298
- Prognosis, ampullary carcinoma after resection, cytometric and histometric predictors, 243
- Prostate, FNA image and textural analysis, comparison with breast FNA, 105
- Receptors in breast carcinomas, IC and image analysis
 - ER, 307
 - PR, 298
- Rectum, adenocarcinoma, nuclear morphometric measurements, 173
- Salivary gland tumors, methodologic aspects of DNA analysis by image cytometry, 379
- Sampling methods, influence on cytomorphometry, 225
- Segmentation, image, use of adaptive color basis transformation, 53
- Shape, nuclear, evaluation of irregularity, 341
- Skin, vulvar
 - Bowenoid papulosis, classification as low-grade *in situ* carcinoma of the epidermis on the basis of histomorphologic and DNA ploidy studies, 419
 - Paget's disease, cytologic, histologic, DNA ploidy and EM analysis, 413
- Southern blot analysis, method of extracting DNA from FNAs of human solid tumors, 375
- S-phase fraction, FCM calculation
 - In breast and colon carcinoma, 391
 - Influence of elimination of lymphocytes from tumor cell suspensions, 384
- Splenocytes, normal and calorie-restricted mice, computerized morphometric analysis
 - Cell features, 407
 - Chromatin changes, 361
- Stains/staining (see also IC, MAb), thionin-eosin for bronchial cytology, 131
- Statistical analysis of monocyte structure in malignant lymphoma, predictive value, 403
- Stomach, Paneth cell metaplasia, image analysis quantitation, 115
- Thyroid, papillary carcinoma, correlation of LM and EM nuclear features, 331
- Tissue processing, influence on nuclear morphometric features, 219
- Tumors
 - Human solid, method of extracting DNA from FNAs for Southern Blot analysis, 375
 - Lung
 - Double, quantitative pathologic analysis, 43
 - IC analysis on FNA cytocentrifuges, 140
 - Salivary gland, methodologic aspects of DNA assessment by image cytometry, 379
- Urine, computer image analysis, selective mapping algorithm for, 203
- Vascularization, tumor-invaded brain, image analysis estimation, 286

Vimentin, MAb stain for
Liver FNA, differentiation between primary and meta-
static carcinoma, 8
Lymph node FNA in diagnosis of NHL, 15
Vulvar skin
Bowenoid papulosis, classification as low-grade *in situ*

carcinoma of the epidermis on the basis of histo-
morphologic and DNA ploidy studies, 419
Paget's disease, cytologic, histologic, DNA ploidy and
EM analysis, 413

Dates of I.A.C.-Sponsored Events

The International Academy of Cytology will sponsor the following events in the foreseeable future:

<i>Date</i>	<i>Event</i>	<i>Place</i>
March 17-24, 1990	34th Tutorial on Clinical Cytology	Knickerbocker Hotel Chicago, Illinois, U.S.A.
March 25-27, 1990	7th International Conference on Automated Cytometry and Histometry Including Expert Systems	Knickerbocker Hotel Chicago, Illinois, U.S.A.
October 20-27, 1990	16th International Tutorial on Clinical Cytology	Vienna Intercontinental Hotel Vienna, Austria
May 8-14, 1991	17th International Tutorial on Clinical Cytology	Nihon Toshi Center Tokyo, Japan
May 3-7, 1992	11th International Congress of Cytology	Hyatt Hotel Melbourne, Australia
May 22-25, 1995	12th International Congress of Cytology	Madrid, Spain

Please direct all inquiries to: The International Academy of Cytology
Committee on Continuing Education
5841 South Maryland Avenue, HM 449
Chicago, IL 60637, U.S.A.
